

Is your verifier telling you the truth?

Even the best verifier needs to be regularly challenged for conformance

The New GS1•US 2D Judge™ Certified Data Matrix Calibrated Conformance Standard Test Card Ensures Full ISO 2D Verifier Conformance

IT'S A FACT: Not all bar code verifiers are created equal and until now there has been no way to check their accuracy. Now there is. GS1•US Data Matrix test card symbols are precisely engineered to challenge all 2D verifiers for conformance with ISO/IEC 16022, 15415 and 15426-2. Each card is certified by the GS1•US 2D Judge – the ultimate authority on 2D symbol quality. This is the only official test card specifically for 2D verifier conformance testing.
