PIPS QCHSP500 Dot Matrix Printer

Designed as a direct replacement or substitute for all Handheld Products Quick-Check printers

For Quick-Check series verifiers

The QCHSP500 combines renowned reliability and a multitude of high-end features into a compact, value-driven solution. Features such as the logic seeking mechanism, new high-speed print head and the latest electronics contribute to the high print speed of the QCHSP500. This print speed of over 4 ips enables th QCHSP500 to outperform the competitors of it's class.

The hinged cover of the QCHSP500, with its integrated "rain channel", protects the printer form liquid spills and other debris. Protection from the elements and a single color highlight the features of the QCHSP500 series to provide an excellent solution for environments where airborne debris are a factor.

An internal universal power supply yields a smaller footprint, and combined with the recessed cable connections make for easy installation and an organized workstation.

The QCHSP500 was created with value, performance, and features that will raise the bar for impact printers.

Available only in Charcoal Gray, for 2.25"width receipt paper.
